

QUALIPRO LUBRICANTS

Protect - Clean - Cool

BENTONITE EP 2

Characteristics: **BENTONITE EP 2 GREASE** is an inorganic clay based grease for plain and rolling bearings operating at temperatures higher than those at which conventional soap based greases can be used.

BENTONITE EP 2 GREASE is straw coloured multipurpose grease containing anti corrosion and EP additives. This is suitable for most conditions especially at elevated temperatures.

The grease performance is limited only by the properties of the base oil. This grease will give excellent service life at temperatures in excess of 160°C, provided the re-lubrication period is suitable adjusted.

This grease is mostly used in underground mining, plastic injection moulders, etc.

Data:

NLGI consistency	2
Worked penetration	275
Drop point	None melt
Base oil viscosity @ 40°C	460

Special features:

- ❖ High temperature resistant
- ❖ Non melt
- ❖ Good sealing properties
- ❖ Resists softening
- ❖ Good EP properties
- ❖ Reduced maintenance
- ❖ No leaking of grease from bearings
