

QUALIPRO LUBRICANTS
Protect - Clean - Cool

Description

Graphite Grease EP 2

QP Graphite Grease EP 2 is a Blackish / Dark Grey colour grease containing premium quality base oils, calcium base soap and finely dispersed lubricating graphite.

Outstanding Features

- **Lowers maintenance costs:** QP Graphite Grease EP 2 lubricant protects against component wear under high load conditions and shock loading
- **Ease of application:** Good pump ability characteristics of calcium thickener provide suitable flow properties for grease pump application systems.
- **Reduces re-lubrication costs:** Superior adhesiveness ensures grease stays in place and resist leakage, as well as in typical severity and shock load conditions.

Specifications

Properties	Method	Specs
NLGI Consistency		2
Colour		Black / Grey
Penetration		280
Graphite Content		10
Dropping Point °C		90

These characteristics are typical to current production, variations may occur.

Application:

- QP Graphite Grease EP 2 is recommended for use in open gears, pantographs, pump glands, link pins, bushes and linkages.
- It could be used in rail and flange lubricating equipment, pantograph copper strips, contact wires, steam locomotive pins, bogie centres, synchro-lift wire ropes and it is ideally suited for plain bearings on welding machines or where plain bearings are badly worn.
